ISERink

Student L2A2

Instructions: Answer the following questions in small groups. Be prepared to discuss your answers with the rest of the class.

This activity is focused on two IT environments with which you should be fairly familiar. Apply the following comparison questions in relations to a home environment and a high school environment:

1. How are the purposes of a Home and School similar?
2. How are the purposes of a Home and School different?
3. How important is the IT environment's functionality to each of the environments?
4. How do the IT environments' costs compare?

Would you guess that these environments are affordable to their respective owners?

Why do you think that?

5. How do the laws, regulations or internal rules compare between these two environments?
